HC relief for J&J, can restart Mulund factory

Mumbai, Sep 19 (PTI) In a relief for the baby products maker Johnson and Johnson (J&J), the Bombay High Court today allowed the company to restart the manufacturing of baby powder at its Mulund unit, which had been stopped upon the order of Maharashtra Food and Drug Administration.

FDA had ordered shut down of the plant for not treating a batch of talcum powder for ethylene oxide residue in 2007.

HC Relief for J&J, Can Restart Production at Mulund Unit

In a relief for the baby products maker Johnson and Johnson (J&J), the Bombay High Court today allowed the company to restart the manufacturing of baby powder at its Mulund unit, which had been stopped upon the order of Maharashtra Food and Drug Administration.

FDA had ordered shut down of the plant for not treating a batch of talcum powder for ethylene oxide residue in 2007.

The division bench of Justices S J Vazifdar and K R Shriram was hearing a petition filed by Johnson and Johnson challenging the June 24 order of FDA appellate authority.

While allowing resumption of production, court today referred the matter back to the appellate authority for a reconsideration, saying that "the proportionality (of the punishment vis a vis the offence) issue needs to be seen".

In March, FDA cancelled the licence of the Mulund factory after it found that 15 batches of baby talcum powder manufactured there in 2007 were sterilised using ethylene oxide, a chemical that is widely believed to be carcinogenic.

FDA alleged that the company did not register the process with it, and failed to conduct tests for traces of ethylene oxide in the powder.

The company challenged the order, but in June the cancellation of license was upheld by the FDA's appellate authority.

Senior counsel Rafiq Dada, appearing for the company, said the company was not using ethylene oxide treatment process anymore.

FDA counsel Ashutosh Kumbhakoni had, however, opposed the petition and said the company had not expressed any remorse even after the issue came to light.

Headline: The ban on Johnson has been lifted

Mumbai: J&J used a sterilization process to reduce the chances of contracting cancer which could arise from strains of bacteria present in baby powder. But the ethylene oxide used for sterilization was above the permissible limits, which led to the FDA cancelling their Mulund Factory License. As per the High Court's decision, they have given J&J the green signal to resume manufacturing operations. The High Court on Thursday, advised the FDA to again appear for the hearing. In the year 2007, J&J manufactured 1,60,000 batches of talcum powder using cancerous substance ethylene oxide without the prior permissions to sterilize the powder.

In return, the FDA had taken strict action against Johnson & Johnson and cancelled their manufacturing license for all products and took strict action against them. Post FDA's decision, J&J had filed an appeal in the High Court against cancellation of their license. The hearing was done in front of Judges SJ Vazifdar and MS Sonak. Post the decision, the judges has asked to complete the case with the appellate authority. Senior Advocate Ashutosh Kumbhakoni appeared for FDA in this case.

Post receiving the directives from the High Court, J&J spokesperson informed, "we will soon start the production of all their products at their Mulund Plant. Nothing is more important to us than the health of our consumers and we shall strive to win their confidence again, this is a very important decision for us."

Court allows J&J to resume production at Mumbai plant

Our Bureau

Mumbai, Sept. 24

The Bombay High Court has allowed Johnson & Johnson to resume its manufacturing activities at the Mulund plant in Mumbai. J&J had lost its licence to manufacture cosmetics at the plant, with the Maharashtra Food and Drug Administration finding the company guilty of using ethylene oxide in a limited number of batches of baby powder in 2007.

Ethylene oxide is known to be a chemical that causes cancer. On the basis of a complaint, the Maharashtra Food and Drug Administration (FDA) had cancelled the company's Mulund plant licence.

In 2007, 15 finished batches of Johnson baby powder were found to have higher pH levels than the prescribed limits. These batches were reprocessed for pH correction, to meet the quality specification, said the company. However, on April 10, 2013, J&J received an order from the Maharashtra FDA cancelling its cosmetic manufacturing licence at the Mulund plant, with effect from June 24.

Bombay HC permits Johnson & Johnson to restart Mulund unit operations

OUR BUREAU

MUMBAI, SEP 24:

The Bombay High Court has allowed Johnson & Johnson to resume its manufacturing activities at the Mulund plant in Mumbai. Johnson & Johnson (J&J) had lost its license to manufacture cosmetics at the plant, with the Maharashtra Food and Drug Administration finding the company guilty of using ethylene oxide in a limited number of batches of baby powder in 2007.

Ethylene oxide is known to be a chemical that causes cancer. On the basis of a complaint, the Maharashtra Food and Drug Administration (FDA) had cancelled the company's Mulund plant licence.

In 2007, 15 finished batches of Johnson baby powder were found to have higher pH levels than the prescribed limits. These batches were reprocessed for pH correction, to meet the quality specification. However, due to the excessive manual handling of these 15 batches during reprocessing, the batches at the finished goods stage were treated with ethylene oxide to reduce the anticipated increase in bio-burden. The product had an expiry date of 2010.

However, on April 10, 2013, J&J received an order from the Maharashtra FDA cancelling its Cosmetic Manufacturing license at the Mulund plant, with effect from June 24. The company said the FDA did not issue a show cause notice to J&J before cancellation of the license.

An appeal against the order was filed with the Ministry of FDA in Maharashtra, requesting for an immediate stay, but was rejected by the FDA Minister of Maharashtra. The company subsequently filed a writ petition on July 12, 2013 in the Bombay High Court challenging the FDA order.

With the Bombay High Court setting aside the Maharashtra FDA order, the company has said it would resume cosmetic manufacturing at its Mulund plant in Mumbai in due course. ``We will continue to work closely with Maharashtra FDA, and provide safe, high quality products," said a J&J India spokesperson.

The FDA action was specific to the cosmetics production at the Mulund plant in India and did not impact global manufacturing or any other plants in India, the company said.

Johnson & Johnson To Resume Manufacture of Cosmetics At The Mulund Plant: The Bombay High Court today allowed baby products manufacturer Johnson & Johnson to restart the manufacturing of baby powder at its Mulund unit, which had been stopped upon the order of Maharashtra Food and Drug Administration.

Indlawnews.com – Online

September 24, 2013

Bombay HC allows production in J&J Mulund unit, company welcomes

(UNI) The Bombay High Court has quashed the Food and Drug Administration's (FDA) order which had cancelled the manufacturing licence of the Johnson & Johnson (J&J)'s unit situated in eastern suburb of Mulund. The decision of the court now allows the company's baby powder facility, which was shut since June 24, to resume production.

The division bench of Justices S J Vazifdar and M S Sonak, while quashing the FDA's order yesterday, took into account 'compensation and closure' expense for the company, and observed that the matter was serious and must be looked into and reconsidered by the FDA minister, who is the appellate authority.

The FDA had alleged that the company sterilized 15 batches of baby powder boxes in 2007 with 'carcinogenic' ethylene oxide and did not check for its residue.

J&J, on their part, said that as part of an audit conducted in 2009, they had checked samples of three batches and found no residue.

Reiterating their stand, they said, 'We will continue to work closely with Maharashtra FDA, and to provide India with safe, high quality products that help people care for themselves and their families.'

J&J told the High Court that the 15 batches were brought back to its facility and tested according to a validated process before release into the market.

Reacting to the High Court decision yesterday, J&J, in a statement released today, said, 'We are very pleased to inform you that the Bombay High Court has set aside the Maharashtra FDA order and we will be resuming cosmetic manufacturing at our Mulund plant in Mumbai in due course.'

'Nothing is more important to us than the well-being of consumers, and we see this outcome as a significant step in restoring their confidence,' it added. UNI

Johnson & Johnson to Resume Manufacturing of Cosmetics at the Mulund Plant

PR Newswire

MUMBAI, September 24, 2013

The Bombay High Court today allowed baby products manufacturer Johnson & Johnson to restart the manufacturing of baby powder at its Mulund unit, which had been stopped upon the order of Maharashtra Food and Drug Administration.

The Honourable High Court passed this judgment after due consideration of all facts related to the case. The court also found the company's offer to test the batches of baby powder in question, reasonable. Further, there was no scientific foundation that there were any carcinogens present in that batch of baby powder.

"Nothing is more important to us than the well-being of consumers, and we see this outcome as a significant step in restoring their confidence. We will continue to work closely with Maharashtra FDA, and provide India with safe, high quality products that help people care for themselves and their families," said a Johnson & Johnson, India spokesperson.

For the past 100 years, Johnson & Johnson has earned the trust of over one billion families and healthcare professionals. Our commitment to safety and health of our consumers has and will always be, our top priority.

Headline: High Court has given permission to reopen the Johnson and Johnson mill at Mumbai

Mumbai, September 25. The Mumbai High Court has given permission to reopen the Johnson and Johnson Muland mill at Mumbai yesterday.

In 2007, there was an allegation raised against this company that high level of chemical substance which is injurious to the health of babies, was used for making the baby talc powder. Followed by this, Maharashtra Food and Drugs Administration had taken action against it. It cancelled the license for the production of cosmetic products of Johnson and Johnson industry.

The company appealed against the cancellation of license to the Maharashtra Food and Drugs Administration. But, it rejected to cancel the order. After that, on 12th July 2013 a case was filed in the Mumbai High Court on behalf of the company. After reviewed the case the court dismissed the order through its judgment. Followed by this, the spokesman of Johnson and Johnson Company said, 'we will give full cooperation to Maharashtra Food and Drugs Administration and we'll pay more attention to the welfare of the babies and we'll produce baby products in high standard. And, the Muland will be opened shortly.'

कॉस्मेटिक्सचे उत्पादन
पुन्हा सुरू करणार !**

२४ सप्टेंबर २०१३- मुंबई
उच्च न्यायालयाने शिशू उत्पादने
निर्मिता जॉन्सन एन्ड जॉन्सनला
त्यांच्या मुलुंड येथील
कारखान्यात बेबी पावडरचे
उत्पादन पुन्हा सुरू करण्याची
परवानगी आज दिली. सदर
उत्पादन अन्न व औषधी प्रशासन,
महाराष्ट्र राज्य यांच्या आदेशाने
थांबविण्यात आले होते. मा. उच्च
न्यायालयाने प्रकरणाशी संबंधित
सर्व तथ्ये लक्षात घेतल्यानंतर हा
निर्णय दिला. बेबी पावडरच्या
बॅचेसची चाचणी घेण्याच्या
कंपनीचा प्रस्तावही
न्यायालयाला यथार्थ वाटला.
त्याशिवाय, बेबी पावडरच्या त्या
बॅचमध्ये कार्सिनोजेन्स
(कर्करोगकारके) होती यास
कोणताही वैज्ञानिक आधार
नव्हता. ग्राहकांच्या आरोग्याहून
अधिक महत्वाचे आम्हाला अन्य

काहीही नाही, आणि त्यांचा
भरवसा पुनर्स्थापित करण्याच्या
दृष्टीने एक महत्वाचे पाऊल या
दृष्टीने आम्ही या निकालाकडे
पाहतो. आम्ही अन्न व औषधी
प्रशासन, महाराष्ट्र यांचेबरोबर
यापुढेही मिळून कार्य करू आणि
भारतास सुरक्षित व उच्च दर्जाची
उत्पादने पुरवू, जी लोकांना त्यांची
व त्यांच्या कुटुंबियांची काळजी
घेण्यास सहाय्य करतील. असेही
जॉन्सन एन्ड जॉन्सनच्या भारतीय
शाखेचा प्रवक्ता म्हणाला. मागील
१०० वर्षांपासून, जॉन्सन एन्ड
जॉन्सन ने १०० कोटींहून अधिक
कुटुंबे व आरोग्य व्यवसायाकांचा
विश्वास संपादित केला आहे.
आमच्या ग्राहकांच्या आरोग्य व
सुरक्षेसाठी आमची बचनबद्धता
ही नेहमीच आमच्यासाठी उच्च
प्राथमिकता होती व असणार
आहे.

Headline: Johnson & Johnson will start manufacturing of cosmetic goods at their Mulund plant

They have started their production starting from today. The same had been stopped by the FDA, Maharashtra.

Honorable High Court has studied the entire case and given this decision. Company's proposal of testing the baby powder was found to be feasible by the HC.

“Nothing is more important to us than the well-being of consumers, and we see this outcome as a significant step in restoring their confidence. We will continue to work closely with Maharashtra FDA, and provide India with safe, high quality products that help people care for themselves and their families”, said a Johnson & Johnson, India spokesperson.

Johnson & Johnson To Resume Manufacture Of Cosmetics At The Mulund Plant

The Bombay High Court today allowed baby products manufacturer Johnson & Johnson to restart the manufacturing of baby powder at its Mulund unit, which had been stopped upon the order of Maharashtra Food and Drug Administration. The Honourable High Court passed this judgment after due consideration of all facts related to the case. The Court also found the company's offer to test the batches of baby powder in question, reasonable. Further, there was no scientific foundation that there were any carcinogens present in that batch of baby powder.

Headline: Johnson and Johnson Mulund plant started production again

Chennai, September 27. Mumbai High Court has given permission Johnson and Johnson, the producer of baby products, to restart the baby talc powder production at Mulund unit which was stopped by an order issued by the Maharashtra Food and Drugs Administration.

After reviewing all the facts deeply, the respectful High court gave this judgment. By its reasonable questions the court also considered the company's testing scope by groups.

Furthermore, the court gave the permission by saying that there is no concrete scientific evidence for the growth of inducement of cancer in the groups of baby talc powder.

कॉस्मेटिक निर्माण का कार्य**

वाणिज्य प्रतिनिधि
नागपूर, 1 अक्टूबर. मुंबई न्यायालय ने महाराष्ट्र एफडीए के आदेश को रद्द कर दिया है तथा अब जॉन्सन एंड जॉन्सन बेबी पाउडर कंपनी पूर्व की ही भांति अपने मुलुंड संयंत्र में कॉस्मेटिक निर्माण के कार्य को पुनः आरंभ कर सकेगा. कंपनी ने कहा कि अपने उपभोक्ताओं के कल्याण से बढ़कर हमारे लिए कुछ भी महत्वपूर्ण नहीं है और हम इस फैसले को अपने विश्वास को सही

साबित करने की ओर एक कदम के रूप में देखते हैं. हम महाराष्ट्र एफडीए के साथ मिलकर एक साथ काम करते रहेंगे तथा भारत को सुरक्षित व उच्च गुणवत्ता वाले उत्पाद प्रदान करते रहेंगे जो लोगों की सहायता खुद की और उनके परिवार की देखभाल करने में करेंगे. अधिक जानकारी के लिए रैसम डिसूजा, निदेशक, कॉर्पोरेट कम्युनिकेशन, जॉन्सन एंड जॉन्सन लि. से संपर्क किया जा सकता है.

जॉन्सन एन्ड जॉन्सन मुलुंड येथील कारखान्यात कॉस्मेटिक्सचे उत्पादन पुन्हा सुरु करणार !

कोल्हापूर, दि. २ : मुंबई उच्च न्यायालयाने शिशू उत्पादने निर्माता जॉन्सन एन्ड जॉन्सनला त्यांच्या मुलुंड येथील कारखान्यात बेबी पावडरचे उत्पादन पुन्हा सुरु करण्याची परवानगी आज दिली. सदर उत्पादन अन्न व औषधी प्रशासन, महाराष्ट्र राज्य यांच्या आदेशाने थांबविण्यात आले होते.

मा. उच्च न्यायालयाने प्रकरणाशी संबंधित सर्व तथ्ये लक्षात घेतल्यानंतर हा निर्णय दिला. बेबी पावडरच्या बॅचेसची चाचणी घेण्याच्या कंपनीचा

प्रस्तावही न्यायालयाला यथार्थ वाटला. त्याशिवाय, बेबी पावडरच्या त्या बॅचमध्ये कार्सिनोजेन्स (कर्करोगकारके) होती यास कोणताही वैज्ञानिक आधार नव्हता. "ग्राहकांच्या आरोग्याहून अधिक महत्त्वाचे आम्हाला अन्य काहीही नाही, आणि त्यांचा भरवसा पुर्नस्थापित करण्याच्या दृष्टीने एक महत्त्वाचे पाऊल या दृष्टीने आम्ही या निकालाकडे पाहतो. आम्ही अन्न व औषधी प्रशासन, महाराष्ट्र यांच्याबरोबर यापुढेही मिळून कार्य करू आणि भारतास सुरक्षित व उच्च दर्जाची

उत्पादने पुरवू, जी शिशूंच्या त्यांची व त्यांच्या कुटुंबियांच्या काळजी घेण्यास सहाय्य करतील." असेही जॉन्सन एन्ड जॉन्सनच्या भारतीय शाखेचा प्रवक्ता म्हणाला.

मागील १०० वर्षांपासून, जॉन्सन एन्ड जॉन्सन ने १०० कोटींहून अधिक कुटुंबे व आरोग्य व्यवसायिकांचा विश्वास संपादित केला आहे. आमच्या ग्राहकांच्या आरोग्य व सुरक्षेसाठी आमची वचनबद्धता ही नेहमीच आमच्यासाठी उच्च प्राथमिकता होती व असणार आहे.
